**NEW
FOR 2015!**

Aurora – The Northern Lights are lit!

Designed specifically for Moss Nook in St Helens, this bait needed to tick a few boxes; Full HNV properties, high solubility, high levels of Krill, highly attractive, and be a red fishmeal bait. Being well know for our passion for HNV style baits, this project was right up our street.

What we created is a really attractive, fully balanced, nutritious and very recognisable bait, crammed with top quality Krill Meal and Krill Hydrolysate, and capped off with a powerful Squid flavour blend with sweet undertones.

The bait is supremely attractive, and fish show a significant preference to it over other food items. We've caught fish that are literally spewing out naturals on the bait, such is its pulling power!

Available in 14mm, 16mm and 18mm sizes.

**THIS IS
A SERIOUSLY
AWESOME DAY
TICKET WATER
BAIT!**
